

AI DIFFUSION AND POLICY IN AFRICA – EXPERIMENTAL DATA

NEXTRADE GROUP
World trade is changing. Are you?

KATI SUOMINEN – KATI@NEXTRADEGROUPLLC.COM

DECEMBER 2023

DIFFUSION OF AI AND POLICIES CONDUCTIVE TO AI IN AFRICA: MAIN CONCLUSIONS

- Growing numbers of African startups are founded with AI-driven business models, for example in logistics, finance and healthcare
- AI use is diffusing also among African SMEs, with majorities of SMEs reporting some AI use cases
 - “AI Superuser” SMEs are better performing, export-driven firms that invest heavily in AI
 - “AI Sporadics” are more likely to be micro enterprises in rural areas and invest only a little in AI
- AI diffusion and AI-enabling policies correlate: Countries with a high density of AI-driven startups and large share of SMEs that use AI intensively also have in place policies that encourage AI adoption and use
- Africa is behind other parts of the world in adopting policies conducive to the diffusion and use of AI, including in the future AFCFTA Digital Protocol – this opens a work agenda for the eTrade and Tech for Trade Alliances

AI-DRIVEN BUSINESS MODELS ARE PREVALENT AMONG NEW STARTUPS

Startups founded in 2000-23 with AI-driven business models: Africa has >550 and is still nascent compared to global benchmarks

Share of AI-driven startups of all startups created in 2023, by country

Source: Nextrade Group calculations based on Crunchbase

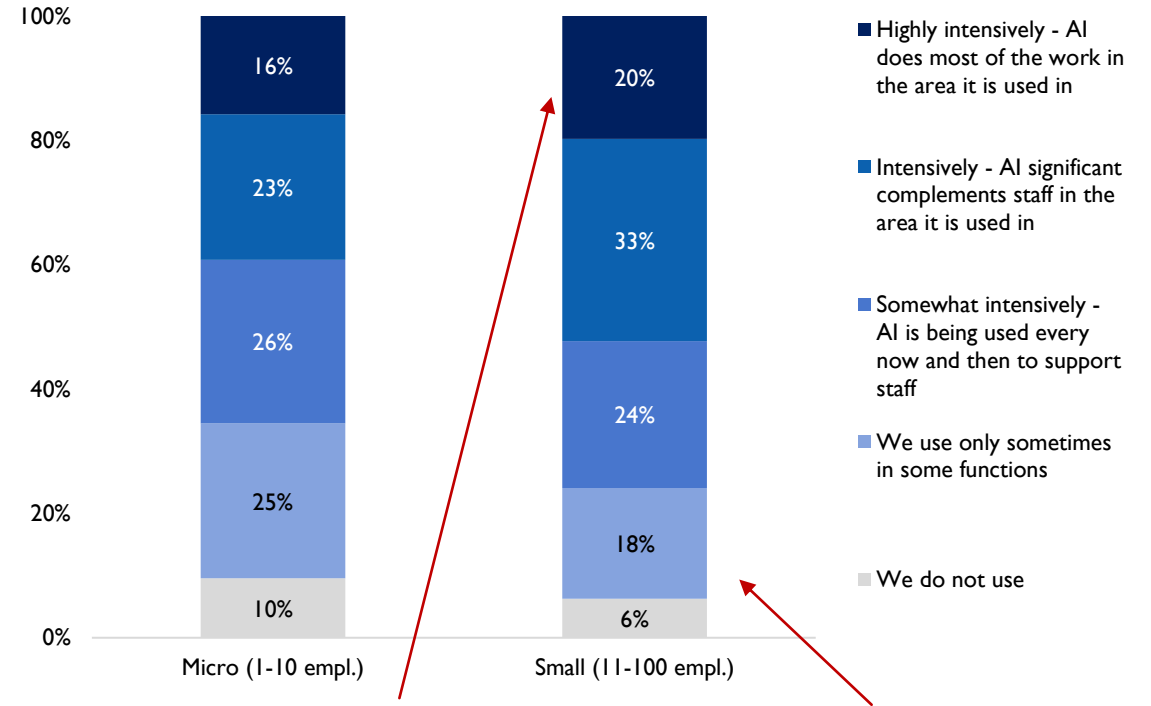

ALSO AFRICAN SMES (NOT STARTUPS) USE AI IN VARIOUS WAYS; >50% REPORT USING AI INTENSIVELY

SMEs' AI use cases

- We have used >5 years
- We have used 3-5 years
- We have used 1-2 years
- We have used <1 year
- We plan to use in 2024
- We do not use or plan to use

Diffusion and intensity of AI use among SMEs

Superusers:

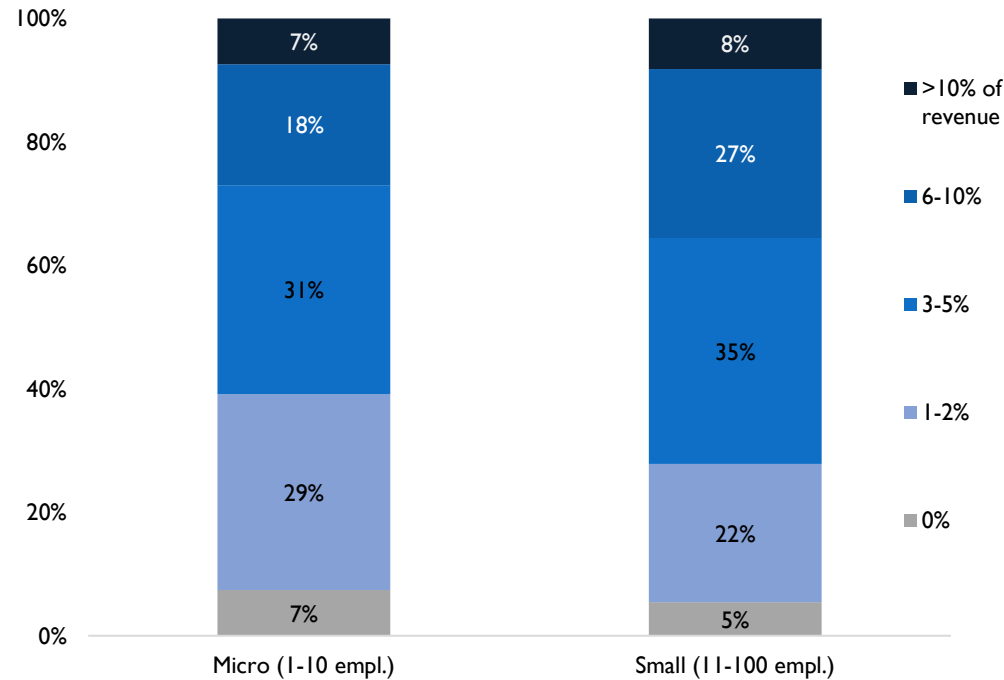

- More médium sized: 60% have >25 employees
- 78% report "very significant" spend on AI
- Export-driven: >Over 80% export
- Most in large urban áreas; only 8% rural

Sporadic users

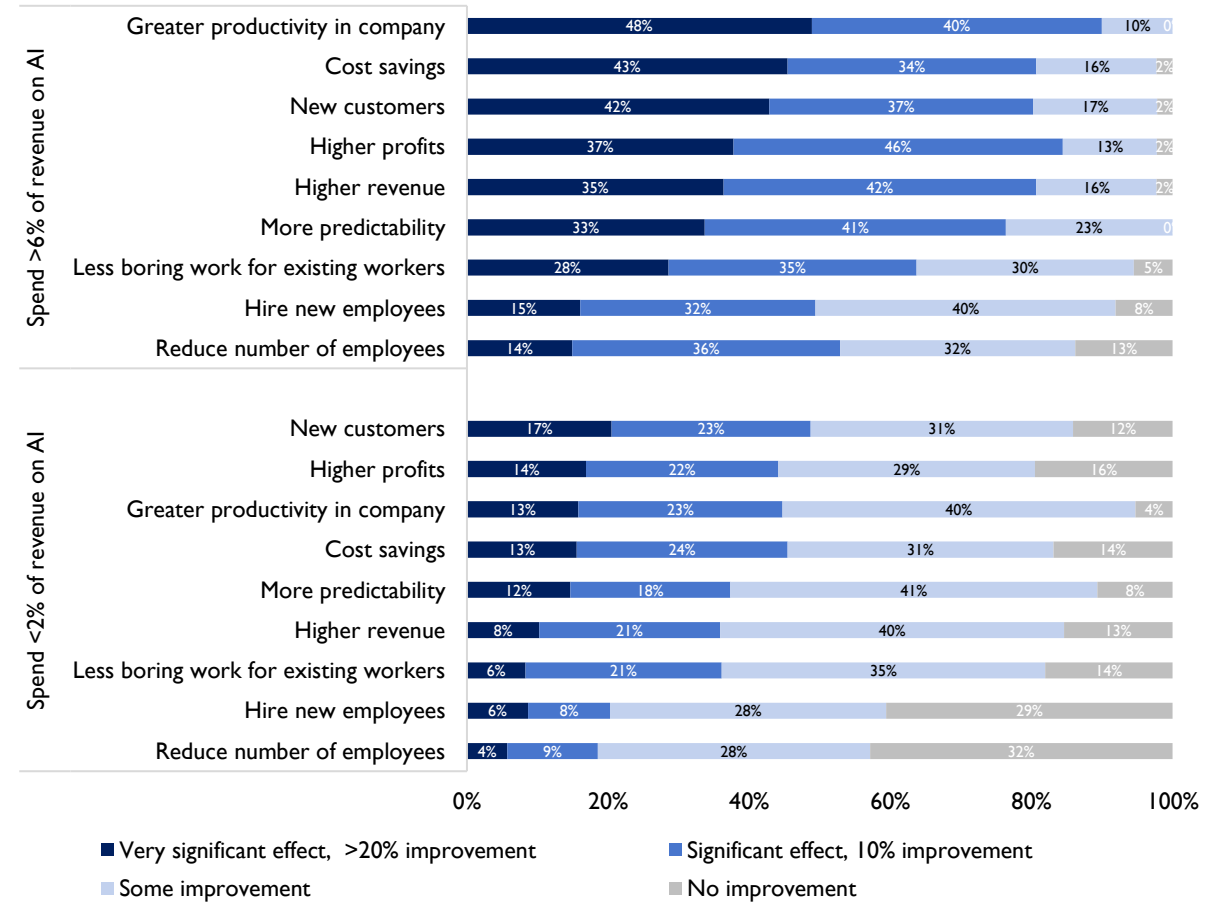

- More micro: 40% have >25 employees
- Only 16% report "significant spend" on AI
- Only ~50% export to at least one market
- Mostly in large urban áreas; 15% rural

MOST SMES SPEND 3% OR MORE OF REVENUE ON AI; THOSE THAT SPEND MOST ALSO REAP GAINS

Emerging market SMEs' AI spending: ~60% of SMEs spend 1-5% of their revenues on AI-driven services, a third spend even more

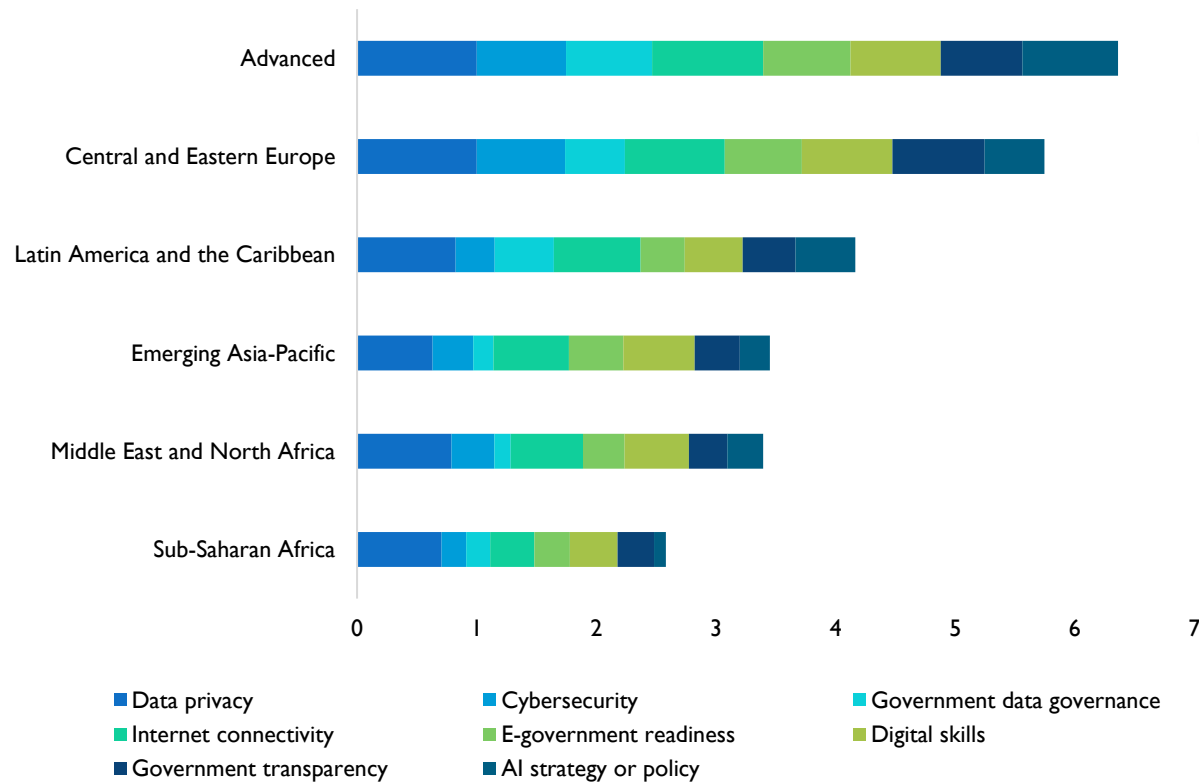

SMES' gains from AI use, by intensity of investment in AI

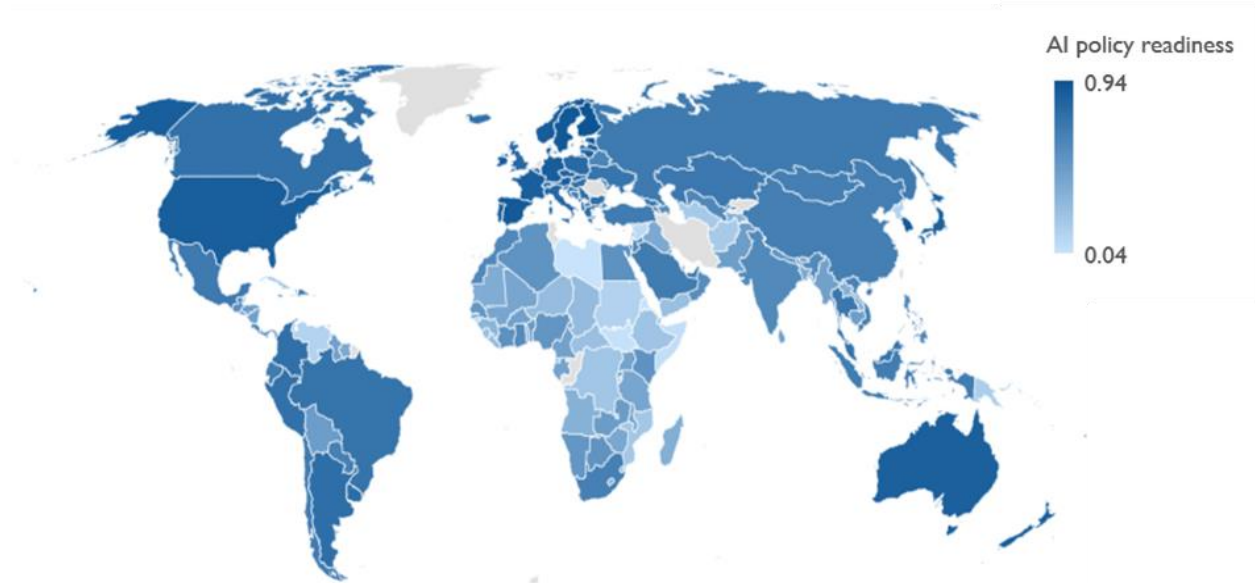

PROMOTING AI DIFFUSION AND USE CASES THROUGH POLICY: ADOPTION OF 14 AI-ENABLING POLICIES IN 190 COUNTRIES → AFRICA NEEDS TO CATCH UP

Nextrade AI Policy Readiness Index, by region

AI policy readiness by country

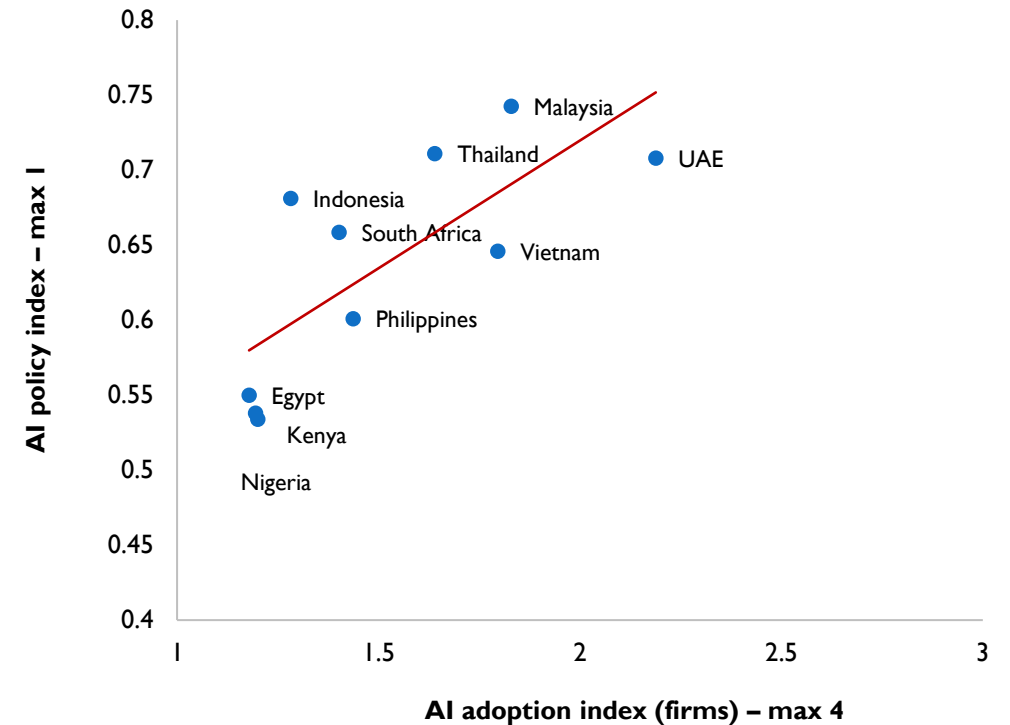

Source: Nextrade Group. Note – AI strategy is broken into 6 further components like whether government promotes interoperability in AI governance with other countries and encourages risk-based assessments.

DIFFUSION OF AI AMONG SMES IS CORRELATED WITH THE ADOPTION OF AI-ENABLING POLICIES (DATA TO BE EXPANDED IN 2024)

Index of prevalence and intensity of AI use among emerging market startups and SMEs (max: 4)

AI adoption by businesses and AI policy readiness, selected economies

NEXT STEPS FOR TECH FOR TRADE AND ETRADE ALLIANCES IN 2024

- In 2024, we will continue deepening on these data and policy prescriptions via **dialogues with African governments on the AFCFTA Digital Protocol and AI Strategy**
 - Aiming to start with East Africa
- **Policy dialogues continue to be held regularly with USG** as on AI, DPIs, data transfer, etc.
 - Next one planned for end of February on DPIs and government procurement
- Nextrade Group will also bring **data on the extent to which African governments adopt and implement the AFCFTA Digital Protocol**, to:
 - Identify countries that need technical assistance to adopt appropriate laws and regulations
 - Monitor countries' compliance with their AFCFTA commitments
 - See our AFCFTA Digital Protocol implementation data below – final data out in Q1 2024

Do African countries meet potential 20 provisions of the AFCFTA Digital Protocol (if the protocol is USMCA digital trade chapter-style)?

Most countries are 30-50% from full implementation

Example of mapping - meet potential 20 provisions of the AFCFTA Digital Protocol?

Country	Egypt	Botswana	Ghana	Kenya	Morocco	Mozambique	Namibia	Niger	Nigeria	Rwanda	South Africa
Electronic transaction framework	●	●	●	●	●	●	●	●	●	●	●
Electronic signatures admissible, legal, and enforceable	●	●	●	●	●	●	●	●	●	●	●
Moratorium on customs duties on electronic transmissions	●	●	●	●	●	●	●	●	●	●	●
Data privacy law in place	●	●	●	●	●	●	●	●	●	●	●
Free crossborder transfer of data of personal information	●	●	●	●	●	●	●	●	●	●	●
Online consumer protection regulation	●	●	●	●	●	●	●	●	●	●	●
Cybersecurity capabilities	●	●	●	●	●	●	●	●	●	●	●
Paperless trade - Information on the Internet	●	●	●	●	●	●	●	●	●	●	●
Paperless trade - Accept digital trade documents	●	●	●	●	●	●	●	●	●	●	-
Crossborder paperless trade	●	●	●	●	●	●	●	●	●	●	-

- Meet
- Partially meet
- Do not meet

Example cont. – do countries meet potential 20 provisions of the AFCFTA Digital Protocol?

Country	Egypt	Botswana	Ghana	Kenya	Morocco	Mozambique	Namibia	Niger	Nigeria	Rwanda	South Africa
National digital strategy	●	●	●	●	●	●	●	●	●	●	●
National cloud first or cloud smart or similar strategy that guides and promotes cloud adoption across government agencies?	●	●	●	●	●	●	●	●	●	●	●
National AI strategy/policy/guidance?	●	●	●	●	●	●	●	●	●	●	●
Does the national AI strategy / regulation / guidance have provisions / plan for AI skilling and capacity-building?	●	●	●	●	●	●	●	●	●	●	●
Does the national AI regulation or guidance support a risk-based approach?	●	●	●	●	●	●	●	●	●	●	●
Does the AI strategy or regulation call for international coordination or interoperability in AI governance?	●	●	●	●	●	●	●	●	●	●	●
Internet connection charge sharing	●	●	●	●	●	●	●	●		●	●
Digital inclusion (Cost of smartphones)	●	●	●	●	●	●	●	-	●	●	●

- Meet
- Partially meet
- Do not meet
